The Atmel AT97SC3205P-SDK2 Development Kit is a custom USB board based upon the Atmel SAM4S ARM microcontroller and the Atmel AT97SC3205 Trusted Platform Module (TPM) device with Serial Peripheral Interface (SPI). User-friendly demonstration and evaluation software is provided with the kit on a USB flash drive. The drive contains demonstration Source Code, hex images for reloading the demo code (if necessary), and Kit Schematics. A USB extension cable is also included. The kit is updateable with the latest SAM4S ARM firmware, when available.

Please contact crypto@atmel.com for more details on demonstration software updates.

Key Features

- AT97SC3205 SPI TPM
- Mini JTAG Connector
- SAMS4 ARM
- JTAG Connector
